

# Acknowledgements

First and foremost I would like to thank my God for keeping me alive. I would also like to appreciate AIMS director Prof. Barry Green, academic director Prof. Jeff Sanders, IT manager Jan Groenewald, and everyone else involved for allowing me to partake in the programme. I also thank the AIMS staff and community at large for the hospitality and help.

Greatest appreciation is to Dr. Farai J. Mhlanga, for his supervision of the essay project and the provision of relevant materials to the topic. His suggestions and input are beyond measure. I also want to acknowledge my tutor, Dr. Yaé Ulrich Gaba and the finance group at large, not forgetting my friends' unwavering support. Thank you guys.

This work is dedicated to my family.
